Under penalty of perjury, we confirm that Rightscorp, Inc. ("Rightscorp") is authorized to act in matters involving the infringement of the compositions which are the subject of this notice. We further certify that the information contained in the notice is both true and accurate based on the data and information available to us.

We ask for your immediate assistance in stopping this unauthorized activity by doing the following. First, for your record keeping purposes, please identify the subscriber or account holder of your network or system and maintain that information so that you can use it to determine repeat infringer activity. Second, below you will find a notice to the subscriber or account holder of your network or system. Please send that notice to this subscriber or account holder so that they can contact us directly to address any issues that they may have regarding this notice and to resolve BMG's claims of direct copyright infringement.

As you identify the subscribers or account holders of your network or system who have used your network or system to infringe copyrights owned or controlled by BMG, we would remind you of your obligation pursuant to 17 U.S.C. ?? 512(i)(1)(a) to adopt, reasonably implement, and inform your subscribers and account holders of a policy that provides for the termination in appropriate circumstances of subscribers and account holders of your system or network who are repeat infringers.

As you know, the problem of copyright infringement on the internet and the problem of repeat infringers are very significant. Therefore, aside from providing you with these notices of infringement and providing you with periodic repeat infringer reports, Rightscorp has also provided you access to a comprehensive database (i.e. our "Dashboard") that contains an ongoing record of all notices of infringement and notices of repeat infringers that we have sent, as well as other information regarding the infringement of copyrights owned or controlled by BMG occurring on or through your system or network by subscribers or account holders of your network or system. Thus, the Dashboard contains the information necessary for you to identify
